

Standard Unit Construction

- Expanded Polystyrene
- White
- 2' height x 2' width nominal (1' 11-5/8" x 1' 11-5/8") x 4" deep
- Tegular dimensions (1' 10.5" x 1' 10.5") x 3.25" deep

Product Options*, **

Color Selection

- Custom color – can be matched by paint manufacture name and color code or physical color chip.

WARNING:

- 1) Although the Hemiffusor™ is fabricated from flame- retardant, high- density expanded polystyrene foam and coated with a flame-retardent paint, it does not meet Class A requirements as defined by the ASTM E-84 testing standard.
- 2) It is the nature of this material to have rough surface imperfections and contain steam vent holes. Some of these imperfections can be partially concealed by a factory paint process. RPG® does not recommend that the Hemiffusor™ be painted in the field and assumes no responsibility for any damage resulting from field painting.
- 3) All dimensions are allowed a tolerance of $\pm 1/16$ " due to material shrinkage and variations.
- 4) Most options merit an increase pricing compared to the standard unit.
- 5) Due to material availability, RPG® reserves the right to change options at any time. Therefore, any special options—whether listed or not—must be confirmed prior to submittal of P.O. and acceptance verified by RPG® Diffusor Systems, Inc.
